Revision Date: 08.03.2024

We, the management of the Gendent SA Inspection Body, are committed to provide world-class, high-quality services, that will fully satisfy our customers' radiation protection and control requirements.

The policy of the Gendent SA Inspection Body in achieving its quality objectives is to utilize an effective Quality Management System specifically designed to recognize, control and monitor all processes which enable, influence and ensure the quality of the services we provide.

We shall conform to the requirements of ISO/IEC 17020, SANAS Accreditation and the South African Health Products Regulatory Authority (SAHPRA) as documented and adopted in the Quality Management System.

The underlying aim of our Quality Management System is to ensure and enhance the reliability of inspection services through customer satisfaction, continuous improvement and regulatory compliance.

We are and shall remain impartial, committed and independent towards our customers in every aspect of our inspection activities. All information obtained or created during the performance of inspection activities, except as required by law, shall be kept confidential.
